AMSEL-SE-IS-SDW-E-I   DATE: 15 July 1998

MEMORANDUM FOR RUU USERS

SUBJECT: Software Version Description (SVD) for Installation
Support Module (ISM) Record Update Utility (RUU) Interim Change
Package (ICP) P05-A67-08-0A-A

1.   Enclosed is ICP P05-A67-08-0A-A which provides a formal
change information to the Record Update Utility (RUU) ISM.

2.   Acknowledgement of installation of this ICP must be made IAW
instructions provided in Enclosure 1.

3.   This memorandum certifies that the ISM subject software has
been thoroughly tested, is considered to be a quality product,
and is hereby authorized for release to a production environment.

4.   Security Implications: NONE.

Encl   Kevin J. Greaney
                                        Colonel, SC
                                        Commanding

CONTENTS

i

Change Package Control Number: PO5-A67-08-0A-A

1.   Scope.

1.1 Identification. This Software Version Description (SVD)
applies to the Record Update Utility (RUU) running on Army
Standard Information Management System (ASIMS) and networked AIX
operating system on UNIX platforms.

1.2 System Overview. RUU is part of the ISM Project which is an
army-wide Major Automated Information System (MAIS) initiative.

The primary objective of ISM is to enhance, through automation, installation management functions. ISM applications consist of standard procedures packaged into functional applications which automate as well as integrate day-to-day installation processes. ISM applications use the Installation Level Integrated Data Base (ILIDB), which is the central repository for data that is common to more than one ISM application, and various local databases that contain data elements unique to the individual ISM applications.

The RUU software supports the personnel portion of demobiliza-tion. This may be utilized to perform the peacetime (garrison) Military Personnel (MILPER) functions that support In-Processing, Out-Processing and Transition Point Processing. It facilitates the preparation and administrative handling of records, forms, memos and orders and automation of required forms.

1.3 Document Overview. This document provides the instructions necessary for the implementation of the formal Interim Change Package (ICP) P05-A67-08-0A-A of RUU. It informs the users of the changes made to the system and provides Point of Contacts (POCs) to be contacted in case of problems.

2.   Referenced Documents.

2.1 Referenced Documents.   This paragraph has been tailored out.

3.   Version Description.

3.1 Inventory of Materials Released. This paragraph has been tailored out.

3.2 Inventory of Software Contents. Hardware platform - ASIMS/ AIX OS users (installation supported). This change package contains the following files.

PROGRAM	VERSION	UPDATE
README.ruu_080A	0800	15 Jul 1998
install_ruu_080A	0800	15 Jul 1998
ruu_080A.cpio.Z	0800	15 Jul 1998

3.3 Changes Installed.

3.3.1 Corrector Descriptions - Technical.

1.   ECP-S/E   P05-U401-013
      A.   CYCLES: None
      B.   PROGRAM: RUU
      C.   PROBLEM: SGLV Print always marks a 'yes' for
                            unusual family members.
      D.   RESOLUTION: Modified code to correct this problem.
      E.   ICP: P05-A67-08-0A-A

3.3.2 Corrector Descriptions - Functional. None.

3.3.3 Summary of Changes.

a.   Copy library member changes.
      1.   Changed: None.
      2.   Deleted: None.
      3.   Added: None.

b.   Control library member changes.
      1.   Changed: None.
      2.   Deleted: None.
      3.   Added: None.

3.4 Adaptation Data.   This paragraph has been tailored out.

3.5 Related Documents.

3.5.1 Technical Documentation Changes.   A new AIX version of Software Center Operator Manual (SCOM), AISM 25-P05-A67-08-0A-A-A09-AIX-SCOM dated 10 March 1998 has been issued.   This current version of AISM 25-P05-A67-08-0A-A-A09-AIX-SCOM may be obtained from:

U.S.Army Information Systems Software Development Center-Washington
Attn: AMSEL-SE-IS-SDW-E-I, Stop H-17.
Fort Belvoir, VA 22060-5576.

3.5.2 Functional Manual Changes.   There are no functional documentation changes for this package.

3.6 Installation Instructions.   These instructions explain how to install RUU ICP P05-A67-08-0A-A onto the host computer at the installations.

Pre-Install Procedure.   Before beginning to install RUU ICP P05-A67-08-0A-A onto the ISM host computer, follow this procedure to make sure you have the information you will need when installing.

STEP 1.   Verify Oracle.   The Oracle RDBMS must reside on the host and be on-line.

2

Change Package Control Number: P05-A67-08-0A-A

Install Procedure.   This procedure installs ICP P05-A67-08-0A-A for EDMIS R08.0A AIX version 4.2 operating system baseline onto the installation server.   This portion of RUU R08.0A must be installed on each server at the installation.

STEP 1.   Make sure there is a login account and directory for "edmis".

STEP 2.   Login with the login name of "root" on the AIX 4.2 machine.

STEP 3.   Change directory to /usr/tmp.   Make a directory called "ruuICP.080A".

STEP 4.   Change directory to /usr/tmp/ruuICP.080A.   Copy the following files to /usr/tmp/ruuICP.080A.

           README.ruu_080A   650   15 Jul 1998

```
                              P05-A67-08-0A-A.txt
            install_ruu_080A     5731                    15 Jul 1998
            ruu_080A.cpio.Z      1416231                 15 Jul 1998
```

STEP 5.   Execute the following commands:

```
           chmod 777 install_ruu_080A     <Enter>
           ./install_ruu_080A             <Enter>
```

STEP 5.   The resulting log, ruu_080A.log, should be copied to
           the directory /files/home/staff/sdcw at the termination
           of the install. Results of the installation in
           ruu_080A.log should be reviewed.

3.6.1 Installation Effective Date. This ICP should be
immediately implemented upon receipt or NLT 30 days from date of
receipt.

3.6.2 Security Implications. This paragraph has been tailored
out.

3.6.3 ANSOC Installation Instructions. All users receive the
same baseline with change package number through e-mail and
Status Tracking and Reporting System (STARS) Bulletin Board
System (BBS). This change package contains the following files:

```
Quantity  File ID              System          Change Package
1         ruu_080A.cpio.Z      AIX OS 4.2      P05-A67-08-0A-A
          README.ruu_080A
          install_ruu_080A
```

Ensure that all master file backups have been completed prior to
loading this package.

Use these load instructions to develop load procedures that work
best for your installation.

                                    3

Change Package Control Number: P05-A67-08-0A-A

Due to various user configurations, each installation must
determine appropriate block-size and library allocations.

Users must not, repeat, must not, make changes to the files.

Security impact: None.

3.6.4 Special Installation Instructions - All Users. None.

3.6.5 Point of Contact. If there are any problems or questions
with the installation, or any shortage to the contents of this
package, call the Army Network and Systems Operator Center
(ANSOC), Ft.Huachuca: DSN 879-6798/6858 or 1-800-305-3036.

3.6.6 Report of Implementation. Implementation of this change
package must be reported by completing the change package
implementation form. This report must be sent to Ft.Huachuca
using Fax or mail.

3.7 Possible Problems and Known Errors. This paragraph has been
tailored out.

4. Notes.

4.1   Notes.   This paragraph has been tailored out.
